Bandung City

An Informatics Engineering student at the University of Logistics and International Business (ULBI), with experience in full-stack web application development, focusing primarily on backend and API development. Experienced in building RESTful APIs, managing relational databases (SQL & NoSQL), and developing web-based applications using Laravel and Flask. Experienced in building responsive frontend interfaces. In addition to web development, he is interested in implementing AI, particularly utilizing Computer Vision in application projects. Actively involved in organizations and accustomed to working in teams, with a structured approach to problem-solving and developing functional digital solutions.

Pengalaman Kerja

Nose Herbalindo - Jakarta Utara <i>Internship Programmer</i> - Developed and maintained web-based applications using React.js and Golang, delivering RESTful APIs and integrated features that improved application workflow efficiency by 30%. - Designed and integrated PostgreSQL and Redis for data management and caching, improving API response performance by 25% while using Docker to ensure consistent development and deployment environments. - Collaborated within a Scrum-based development team through sprint planning, daily stand-ups, code reviews, and feature delivery, improving sprint completion efficiency by 20% and supporting timely feature releases.	Jun 2026 - Aug 2026
Telkom Indonesia - Jakarta Selatan, Indonesia <i>AI Developer</i> - Developed AI-driven Network Service Quality (NSQ) models to monitor and analyze network performance metrics, achieving 92% accuracy in identifying network performance trends and supporting data-driven infrastructure optimization. - Implemented automated machine-learning-based diagnostic workflows to detect network anomalies, reducing manual troubleshooting time by 40% and accelerating identification of network performance issues. - Integrated intelligent data-processing workflows to transform complex network metrics into actionable insights, reducing network analysis time by 35% and supporting proactive infrastructure maintenance.	Apr 2026 - Jun 2026
PT Asadel Liamsindo Teknologi - Kotawaringin Timur, Kalimantan Tengah <i>Internship Programmer</i> - Engineered LabView AI, an AI-driven health management platform integrating Tesseract OCR and Gemini 2.5 Flash, reducing laboratory report interpretation time by 70% through automated extraction and AI-assisted analysis. - Developed a real-time health monitoring dashboard using React, Capacitor, and Firebase, reducing manual health-data management by 40% through centralized synchronization and dynamic visualization of medical records. - Improved accessibility through guided onboarding and an AI-powered trend narrator, increasing user comprehension of complex laboratory results by 35% based on usability testing.	Jan 2026 - Apr 2026
PixelDege - Bandung, Indonesia <i>Web Developer</i> - Diagnosed clients' digital challenges and engineered custom websites, increasing online visibility by 60% across diverse industries. - Designed and implemented responsive e-commerce platforms with integrated payment systems, raising conversion rates by 35%. - Delivered over 12 client projects with 100% satisfaction, and secured an 80% client retention rate through consistent performance and quality.	Feb 2025 - Sekarang
PT POS PERSERO - Bandung, Indonesia <i>Web Developer</i> - Developed a web-based data management system using Flask (Python) to streamline internal data processing and improve workflow efficiency, reducing manual work by 40% and minimizing data errors. - Designed and implemented responsive user interfaces with HTML, CSS, and JavaScript, ensuring user-friendly interaction and accessibility, which improved employee adoption and task completion speed by 30%. - Integrated MySQL for database management and utilized ngrok for local hosting and real-time testing, ensuring smooth deployment and collaboration within the IT team, resulting in faster testing cycles and reliable data synchronization.	Aug 2025 - Nov 2025

Jenjang Pendidikan

- Created a math quiz app with clean UI and functional logic as a final project.
- Built Warjo food website with HTML, CSS, and PHP as a digital menu system.
- Developed Himajas e-canteen app using Kanban method, implemented during university events.

Pengalaman organisasi

Novo Club - Bandung, Indonesia

Mar 2024 - Aug 2024

Member

- Practiced conflict resolution simulations, boosting negotiation effectiveness by 20% in peer exercises.
- Collaborated on strategic group projects, achieving 100% task completion through strong teamwork.
- Completed 6 workshops on leadership and public speaking, improving confidence and presentation skills.

MPM KEMA - Bandung, Indonesia

Oct 2023 - Sekarang

Coordinator of Commission 2

- Coordinator of Commission 2 at the Student Representative Assembly (Majelis Permusyawaratan Mahasiswa, MPM), responsible for leading a team in supervising, evaluating, and providing recommendations for student organizations' work programs.
- Led a team of 8 members in evaluating 20+ student organizational programs, providing documented feedback that improved implementation success by 30%.
- Facilitated weekly coordination meetings with BEM and UKM to ensure alignment and accountability across all initiatives.
- Designed a structured evaluation framework to monitor student activities, resulting in faster reporting cycles by 40%.

Keterampilan, Prestasi & pengalaman lain

- **Hard Skills** (2025) : Core Engineering & AI: Java (Object- Oriented Programming), Python, JavaScript (ES6+), TypeScript. Web Development (Full-stack): * Frontend: Next.js, Vue.js, Tailwind CSS, Bootstrap. Backend: NestJS, Laravel, PHP. Mobile Development: Flutter (Cross-platform). Database Systems: PostgreSQL, MySQL, SQLite (Database Design, Query Optimization, & ERD Modeling). API & Security: RESTful API Design, Third-party Integration, Authentication & Authorization (JWT, OAuth), Postman for API Testing. Architecture & Methodology: MVC (Model-View-Controller), Service-Oriented Architecture (SOA), Agile Kanban, Version Control (Git/ GitHub).
- **Soft Skills** (2025): Leadership,Team Management, Communication, Negotiation, Critical Thinking , Problem Solving, Time Management, Adaptability, and Detail Oriented
- **Projects** (2025) : Multi- Platform E- Commerce System (Web & Mobile),Developed a scalable backend using Laravel and MySQL, implementing secure user authentication, product CRUD management, and a dynamic shopping cart system. Engineered and tested RESTful APIs using Postman to facilitate seamless data synchronization between the database and client applications. Built a companion mobile application using Flutter, consuming custom APIs to enable real-time product browsing and transaction processing for mobile users. Integrated React.js for a responsive frontend interface, ensuring a consistent user experience across web and mobile platforms. Delivered the complete full-stack solution on schedule as a final capstone project, demonstrating capability in cross-platform development.
